Front-end Web Developer with over 3 years of experience in product design and a strong understanding of design principles, I turn user ideas and requirements into tangible and innovative products using the latest web development tools and technologies. I collaborate with experts and design teams to create web solutions backed by research and tests. My expertise lies in creating pixel perfect websites. That be translating Figma designs or building ones from scratch I thrive on creative development, making sure it provides the user with a memorable experience.

Professional Skills

Technical:

- React, HTML, CSS, Bootstrap, Tailwind, JavaScript (including jQuery), APIs Node.js and Test-Driven Development (TDD), State Management.

Applications:

- GitHub, Git, Visual Studio Code, Slack, Discord, Jira, Adobe Products (expert in Photoshop, InDesign and Illustrator), Figma, Blender (for 3D animations).

Soft:

- Strong interpersonal skills demonstrated by communicating with clients, teams, and non-tech professionals on a daily basis.
 - Strong attention to detail.
 - Creative problem-solving skills.
-

Experience

Junior Front End Web Developer at MMGY Global (May 2023 - current) - London, UK

- React Developer.
- Building landing pages, websites, and interactive AD units. Often, taking the lead in development.
- Dynamic data implementation.
- Developing reusable code and libraries for future use.
- Collaborating closely with the design team to guarantee the technical feasibility of UX/UI designs.
- Product Design - Using Figma to design and prototype projects.
- Conducting performance testing and optimizing websites.

In this role I often have the opportunity to use my Product Design background work alongside the design team for UX/UI. React has been the main framework I've been working with, and I always keep improving my understanding of it on my spare time.

Product Design & Web Development (2019 - 2023) – Remote & South America

Working as a product designer, my main responsibilities include collaborating with clients to turn their ideas into real, tested, and refined products.

- Developed front-end websites using HTML, React, Tailwind CSS and JavaScript showcasing client portfolios to boost social reach.
- Identified and implemented dynamic web solutions in accordance with client standards and requirements.
- Helped clients develop initial concepts and ideas to final products through design processes (Physical products and websites)
- Designed and conducted user research that tested and refined products.
- Collaborated with external partners such as suppliers and contractors to ensure project execution and timely delivery.

3D Designer & Web Developer at Martha Larco Espacio (2021 - 2023) - Remote

Right-hand person of the head interior designer, I assist with design decisions and manage contractors and suppliers. I also took charge of updating the firm's website to reflect its identity and style.

- Advised on design and adapted the firm's web page to be responsive, include latest projects and contact forms to increase web traffic.
- Lead meeting and design sessions to understand client needs and deliver high standard proposals.
- Assisted the head interior designer with scenes and visualization.
- Converted CAD models into highly detailed 3D spaces that serve as a decision-making tool prior to client presentation, which increased the chances of the client picking the proposal by 70%.

Education

- **edX** (2022-2023) - Online
Front End Web Development bootcamp
- **Ravensbourne University** (2016 –2019) - London, UK
Bachelor of Arts (BA) Product Design
- **Parsons School of Design** (2015) – New York, USA
Foundation Studio: Product Design
